Cobra Systems

Cobra Climate Sensor COBRACO2WIFI1B

Firmware version: 1.0 - updated on: 2020-06-19

The device was manufactured in: Netherlands

Security Mechanisms

Security updates		No security updates
Access control		Hardware .
Security oversight		No security audits
Ports and protocols		Not disclosed
Hardware safety		https://cobrasystems.nl/co2-climate-sensor/
Software safety		https://cobrasystems.nl/co2-climate-sensor/
Personal safety		https://cobrasystems.nl/co2-climate-sensor/
Vulnerability disclosure and management		Not disclosed
Software and hardware composition list		Not disclosed
Encryption and key management		Not disclosed

Data Practices

Sensor data collection	Temperature
Sensor type	Temperature sensor
Data collection frequency	Continuous
Purpose	Indoor climate optimization
Data stored on the device	No device storage
Local data retention time	Less than five minutes
Data stored in the cloud	De-identified
Cloud data retention time	Up to 10 years
Data shared with	Not shared
Data sharing frequency	When user requests it
Data sold to	Not sold
Other collected data	Technical information related to the device is collected

Data linkage		Data may be linked with internal data sources
What will be Inferred from User's Data		No data inference
Special data handling practices for children		Not disclosed

	In Compliance with	GDPR
	Privacy policy	https://cobrasystems.nl/privacybeleid/
 More Information	Call Cobra Systems with your questions at	+31 20 73 71 078
	Email Cobra Systems with your questions at	info@cobrasystems.nl
	Functionality when offline	No functionality on offline mode
	Functionality with no data processing	Not applicable
	Physical actuations and triggers	Not disclosed
	Compatible platforms	Everything with an API
